# Ivan S. Harianja

IT Staff | Business Systems Developer

+6282167401147 | harianjaivann@gmail.com | linkedin.com/in/ivan-harianja | github.com/IvanSHarianja | Tegal

## Summary

IT Staff with 1 year of experience at Sapphire Group, a property company, building internal business systems end to end: requirements gathering, SOP design, development, user training, and support. Built two Laravel Filament applications: a live Learning Management System used by about 150 employees, and MY-TRUCK, an operations system for material sales, heavy equipment rental, fleet contracts, and financial reporting. Designed Google Sheets and Apps Script systems for SOP workflows and monitoring across Engineering, Marketing, and Finance, and currently building an integrated system for a wood factory covering seven processes from marketing to finance. Informatics graduate from Diponegoro University (GPA 3.56).

## Core Skills

**Business Systems:** Google Sheets, Google Apps Script, SOP & workflow digitalization, monitoring dashboards

**Backend:** PHP, Laravel, Filament, REST API, TypeScript (ElysiaJS)

**Frontend:** HTML, CSS, JavaScript

**Database:** MySQL, PostgreSQL, relational database design, SQL & PL/SQL

**Tools:** Git, GitHub, Postman, Laragon

**Practices:** Requirements gathering, user acceptance testing (UAT), role-based access control, user training, use case modeling (ICONIX)

**Languages:** Indonesian (Native), English (Intermediate)

## Work Experience

**IT Staff** Oct 2025 - present

Sapphire Group | Property | Tegal, Jawa Tengah

PIC for the internal systems below within the IT team, covering requirements gathering, development, user training, and post-launch support.

***Project: MY-TRUCK*** *| Jun 2026 - present | Laravel, Filament, MySQL*

- Built a web application that moves material sales, heavy equipment rental, fleet contracts, and financial reporting from manual Excel records into one system.
- Designed the database and role-based access for Admin, Accountant, and Owner, so each role sees only the transactions and reports it needs.
- Running user acceptance testing with business users and refining features from their feedback ahead of go-live.

***Project: Learning Management System (LMS)*** *| Aug 2026 - present | Laravel, Filament, MySQL*

- Developed and launched an internal LMS for employee training, structured into programs, modules, and tasks; now live for about 150 employees.
- Built a results dashboard that lets management track each employee's training progress and outcomes.

***Project: SOP & Monitoring Systems*** *| Oct 2025 - present | Google Sheets, Google Apps Script*

- Built the Engineering SOP system covering Notice to Proceed (SPMK) issuance, SLA tracking, and construction progress monitoring.

- Monitored user data entry across the Marketing, Liquidity (Finance), and Engineering SOP systems, tracing input issues and shipping system fixes and improvements.
- Currently building an integrated system for a wood factory that connects seven processes: Marketing, Sales Order, Warehouse, Production, Logistics, Purchasing, and Finance.

**Web Developer (Final Project)** Jan 2025 - May 2025

Polrestabes Semarang | Semarang, Jawa Tengah

- Built a public complaint web application with Laravel and MySQL to improve police-citizen communication.
- Gathered requirements from police stakeholders, designed the complaint database, and built separate interfaces for citizens and officers using the ICONIX process.

**Web Developer (Internship)** Jan 2024 - Apr 2024

Biro Psikologi Poros Semarang | Semarang, Jawa Tengah

- Developed a web-based psychological testing application with Laravel and MySQL, enabling online psychological tests and automated result reports.

## Education

**Bachelor's Degree, Informatics/Computer Science**

*Diponegoro University | Semarang, Jawa Tengah* | August 2021 - July 2025

**GPA** : 3.56

**Final Project** : Web-Based Community Complaint Application for Polrestabes Semarang using the ICONIX Process

## Certifications

- Database Programming with PL/SQL - Oracle Academy
- Java Programming - Oracle Academy (2023)
